

Seatex Ais 100 Service Manual

Chapter 1 : Seatex Ais 100 Service Manual

The automatic identification system (ais) is an automatic tracking system that uses transponders on ships and is used by vessel traffic services (vts). when satellites are used to detect ais signatures, the term satellite-ais (s-ais) is used. ais information supplements marine radar, which continues to be the primary method of collision avoidance for water transport. Tracking the nanosatellite and cubesat revolution in detail. best overview of new space constellations, cubesat companies, cubesat technologies, cubesat instruments, advanced concepts, novel missions, ground station networks.
